The ultimate shaft-driven 4WD chassis in the TB Evolution Series, the TB Evolution 5, has been further tuned and refined to become this limited edition TB Evolution 5 MS. About the Model Race-spec 1/10 R/C TB Evolution 5 MS chassis kit. Features TRF416-style steering and suspension systems. New motor layout sees motor mounted further forward to improve handling characteristics and make spur gear changes much easier. Durable aluminum diff. joint is capable of harnessing the power from even high-output motors. Protective covers over the swing shaft connection ensures smooth and unobstructed operation. Front part of lower deck is made from durable nylon material and is mounted with a small-size bumper that reduces interference with road in case of a roll. Reversible-type suspension features short-span suspension arms, enabling minute settings adjustments. 2-channel R/C system with ESC, motor, body, tires, battery pack and charger all separately required.
